348 Register For "Basic Dividend"

The Social Crediters were well pleased with the sign-up at the Didsbury polling divisions on Monday, when 348 registered at the Registration for Basic Dividend. There was also a large number of electors who applied for forms with the possible intention of signing them later.

Mr. Ray Lantz had charge of the Didsbury East polling division and Mr. Harold Brennan charge of Didsbury West, and they were assisted by a number of members of the Social Credit groups.

Mr. Lantz stated that the registration will be open until September 30 and anyone wishing to do so may register at his office.

We were informed by a prominent local Social Credit official that the sign-up had been large enough to warrant the establishment of a credit house at Didsbury, as the instructions were that if 40 per cent of the farmers signed, a credit house would be established.

At the last provincial election 635 electors cast their ballots, and 346 voted Social Credit.

Since Monday, we are informed, about twenty other registrations have been made.

Registrations at the rural polls were:

Neapolis—119 Registrations; total vote at last election 121; Social Credit vote 91.

Jutland—53 Registrations; total vote at last election 112; Social Credit vote 77.

Melvin—105 Registrations; total vote at last election 130; Social Credit vote 93.

Elkton—144 Registrations; total vote at last election 109; Social Credit vote 90.

Golden Wedding.

The golden wedding anniversary of Rev. and Mrs. Frederick F. Spies was quietly celebrated at their home on Tuesday, August 11, 1936, when a few personal friends gathered to extend good wishes. Due to the recent death of a daughter, anniversary celebrations were curtailed.

Mr. and Mrs. Spies were married at Holland, near Owen Sound, Ont., on August 11, 1886, Mr. Spies being an Evangelical Church minister at that time. He was drawn into the mercantile business at Hawkesville, Ont. in 1892 and remained in business there until 1915, when the family moved to St. Paul de Metis district, where they pioneered. In 1930 Mr. and Mrs. Spies moved to Didsbury, where they have since resided.

Mr. Spies who is 80 years old, was born at West Montrose, near Guelph, Ont. His first 21 years were spent at King's Bush, Ont., and in 1879 he commenced theological studies at the Northwestern College, Naperville, Illinois. He entered the ministry in the Canadian Conference of the Evangelical Church in 1883, preaching in Hanover and Sebringville districts.

Sophia Privat was born Dec. 9th, 1860, in Gray County, Ont. She was 26 years of age when she married Mr. Spies.

Of nine children born to the union five are living. They are Mrs. E. Diefenbacher, New Dundee, Ont., Mrs. F. Clarke, St. Lina, Alberta, Miss Mildred S. Spies, Stratford, Ont., two sons, Reuben, Vegreville, Alberta, and Herbert F., Sugden, Alberta. There are twelve grandchildren.

Congratulations of their very many friends in this community are extended to this popular old couple and best wishes for many more years of happiness together are offered.

Mountain View Council.

The meeting of the council of Mountain View M.D. held Saturday was a quiet affair, the business being mostly of a routine character.

The committee reported that the new well at the Olds Hospital had been completed and a good supply of water had been obtained at 241 feet. The total cost of the well was \$585.64.

An outbreak of scarlet fever was reported, with eight cases. Dr. Hartman, of Olds, was appointed medical health officer to take care of the situation.

Evangelical Church Notes.

The late Rev. F. B. Meyer said, "Intercessory prayer backed by the faith that realizes that God is, and that He is the rewarder of all who seek Him, is probably one of the mightiest forces in earth or heaven."

These words are especially applicable to the Church prayer-meeting. The prayer-meeting is the power house of the church. We are especially anxious to have a larger number in attendance on Wednesday evenings. If you have not been a regular attendant at these meetings, will you not begin now? We will read a portion of Scripture each week at the meetings, make brief comment on the same, but the primary purpose of prayer-meeting is to have the people meet with God.

May we not look for you next week?

Hold Re-Union.

Mr. and Mrs. M. B. Clemens who celebrated their golden wedding anniversary two years ago, were again the centre of a very happy gathering this past weekend when, with the exception of one son, their entire family was reunited for the first time in 15 years.

The event took the form of a motor drive and picnic, the younger members of the party enjoying a dip in the river. Numerous snapshots were taken, among them being one of four generations. The principals in this were Mrs. M. B. Clemens, her daughter, Mrs. M. M. Utterbach of Chelan, Wash., and her daughter, Mrs. E. Conklin of Oakland, Cal. Mrs. Conklin's daughter, Elberta, made the fourth generation.

Of the six children of Mr. and Mrs. Clemens, those present were Mrs. M. M. Utterbach, Chelan, Wash., Mrs. J. W. Halton, Didsbury, Mrs. C. E. Ratcliffe, Kimberley, B.C., Edgar B. Clemens, Calgary, and G. Harold Clemens, of Edmonton. Roy Clemens, Fernie, B.C., was unable to be present.

Nine of the 16 grandchildren and one of the two great-grandchildren were also present.

Win Award in Dominion .22 Rifle Competition

Competing in the Dominion Marksmen .22 Sporting Rifle Competition, Messrs. Leonard Cook, Reginald Hamper, Charles Kohut, Frank Kohut and John Kohut, of the "Didsbury Snipers," Didsbury, won their Gold Maple Leaf Pin, with scores of 995x1000, 993x1000, 989x1000 and 992x1000 respectively.

Over 8,000 Canadians are taking part in this competition.

Wheat Pool Meets Payment

Payment of \$453,000 from the Alberta Wheat Pool in respect of an overpayment made to the Pool in 1929, has been received by the provincial treasury department.

This amount is made up of \$285,000 on interest and sinking fund, and the balance goes to debt retirement.

This is an annual payment made by the Pool in respect to a \$5,000,000 provincial bond issue in 1929.

The payment is due September 1 each year, and this year it has come earlier than usual.

Didsbury Flashes Lose to Ghost Pine

After taking the first game of the series at Ghost Pine on Thursday, Didsbury were eliminated from the Intermediate Softball Playoffs in a double header here on Tuesday.

Curry, the Ghost Pine pitcher, proved too much for the locals and shut them out in the first game for a score of 3-1.

The evening game was close, but Ghost Pine took the lead in the fourth which they held to the finish. Holub, for the locals, pitched a good game, but Curry, Ghost Pine, had the edge and won the game with a score of 4-3.

Didsbury: Berscht, Tuggle, Krebs, Tittsworth, Evans, Honey, R. Gulliver, H. Gulliver, Holub, Brightman.

Ghost Pine: Curry, Huxley, Wallem, Davis, King, McArthur, Parker, Gribbin, Trentham.

Calgary to Pay More For Milk

Commencing August 16, Calgaryans will be required to pay one cent a quart more for milk, one cent more per half pint for table cream, and two cents per half pint more for whipping cream, it was announced today.

Judge A. A. Carpenter, chairman of the board of public utility commissioners, has granted the application of milk producers in the Calgary area for an increase in the price of their product partially to offset serious conditions resulting from the prolonged drought.

The producers, henceforth, will receive \$2.25 for each hundred pounds of milk containing 3.6 per cent butterfat.

Milk in Calgary will be sold at 11 cents a quart instead of 10 cents a quart as at present. Table cream will cost 14 cents for a half pint instead of 13 cents as at present. Whipping cream will be increased to 17 cents a half pint compared with the prevailing price of 15 cents. Jersey milk will sell at 13 cents a quart, an increase of one cent from the prevailing price.

Knox United Church Notes.

There will be no services next Sunday at Westerdale nor at Westcott but we wish to call attention to the time of service at Didsbury. It will be at 7:30 p.m. and the pastor, Rev. J. R. Geeson will be in charge. A cordial invitation is extended to all.

Few Crops Escape Hail Damage

The disastrous hail storm which swept through this district Friday left very few farms undamaged by hail this year. The storm followed the strip which had not been damaged by the hail storm of three weeks ago.

Starting near Harmattan, 12 miles northwest, the hail swept a territory about 6 miles wide and extended 20 miles east. The damage is reported from 40 to 100 per cent.

A number of fields of barley had been cut and several farmers had made a start on the wheat, but very little had been cut. As a result of the storm the feed situation in the district is likely to become acute.

Mr. F. Henning, chief adjutant for the Hail Board, who has been over the ground, estimates that only 20 per cent of the crop is left in the Didsbury district.

WEDDINGS

ARBOUR—TETREAU
St. Stephen's Church, Olds, was the scene of a pretty wedding Wednesday, August 5, when Albina Marie, daughter of Mr. and Mrs. J. Tetreault, of St. Paul and Oscar Arbour, of Didsbury, were united in matrimony by Rev. Father MacLellan.

The bride, becomingly gowned in a smart two-piece frock of blue-pink crepe, with a white picture hat, and carrying a bouquet of pink and white carnations, entered the church on the arm of her father, to the strains of the Bridal Chorus from Lohengrin.

Miss Jean MacDonald, wearing a maize organdie frock, and also carrying carnations, attended the bride. Mr. Eugene LeClaire attended the groom.

After the ceremony the bridal party motored to Didsbury, where breakfast was served in the Rosebud Hotel to relatives and intimate friends.

Mr. and Mrs. Arbour will reside in their new home, 2 miles west of Didsbury.

Out-of-town guests were, Mr. and Mrs. J. Tetreault, Mrs. Bluen, Mr. Paudien, Mrs. J. M. Fontaine, of St. Paul, and Mr. and Mrs. O. Tremblay, of Legal.

A special session of the Alberta Legislature is scheduled to be called on Aug. 25 to deal with implementing of Social Credit and the drought situation, Premier Aberhart stated early this week.

Loans For Agriculture

Appropriate was the warning issued recently to investment companies and investors by S. P. Grosch, K.C., chairman of the Local Government Board of Saskatchewan when he told the Investment Dealers' Association of Canada in session at Jasper, Alberta, that they could not expect to be collectors alone, but must be prepared to continue to loan money.

At the same time, according to press reports of the convention, Mr. Grosch told the bond dealers that they "must be quick to offer concessions and help in debt adjustment if investors are to retain their status and the protection they now have."

It is generally well known that many of the loan companies, if not all of them, have shut down on loans in the prairie provinces and particularly in this attitude applicable to loans to farmers. Where the security is ample and prospects of repayment on maturing dates exceptionally good the mortgage companies are accepting a limited number of "risks" in the cities, but little if any loan money is available to western farmers just now, no matter what their record, how good the security they have to offer or how excellent the character of the prospective borrower.

Thus the farmer and the agricultural industry generally in the west is in somewhat parlous condition when it comes to securing credit to make needed improvements or to carry on operations. It is true that there are governmental boards in existence for the purpose of making agricultural loans but these institutions have either no money available or such a small amount in comparison with the needs of the day that they are obliged to restrict their activities to a few select loans.

In the very few instances where mortgage corporations are prepared to advance money they are still insisting on a return of seven per cent. for their investment and this is a higher rate of interest than borrowers can afford to pay in the light of income from ordinary revenue sources.

It is admitted, of course, that there are two sides to this story as with most stories. Loan company managers say that as custodians of private funds they cannot afford to loan money in the prairie provinces at the present time and particularly they cannot afford to run the risks of making loans to agriculturists. They point to the past few years of combined general economic and agricultural depression, the latter resulting from drought, surplus stocks of wheat and low prices for agricultural produce as an excellent reason why they should keep their purse strings tightly drawn when the farmer asks for a loan.

But more particularly do they inveigh against what they regard as repressive legislation enacted by the several provincial governments as a potent reason for withholding credit from the farmers, legislation which has been placed on the statute books in the belief of the sponsors that they are protecting debtors at a time when they knew not which way to turn to escape from almost intolerable burdens.

Possibly the loan companies themselves are not altogether without blame for this class of legislation in at least some instances, if Mr. Grosch's diagnosis of the cause of it is correct, for he is reported to have declared his belief that "one of the chief reasons for placing upon the statute books legislation which limits the rights of loan companies is to be found in the fact that some companies have adopted an attitude of drift and desire to wait until something turns up, with the result that the debtor gets in touch with a member of the legislature and demands all sorts of drastic legislation against loan companies."

One cannot get away from the fact that in the past four or five years, because of depression, conditions and lack of credit, farm property has perforce been allowed to run down at heels, due to the impossibility of renewing or replacing worn out equipment in anything like the degree necessary to continue to operate on an economic scale or to provide new implements to meet changed methods necessitated by changing conditions.

Almost every farmer knows by experience that this is the case and if he is unable to secure the necessary credit to enable him to replace the worn out tools of his trade and to purchase new equipment necessary for economic operation, the day when he is going to be able to pay his past indebtedness is further deferred and the loan company and the farmer alike suffer as a result.

Since the entire western country is still largely dependent upon agriculture for its future as well as its present welfare, it would appear to be good business for the loan companies to offer concessions in the matter of debt adjustment to a feasible limit and continue to loan money at a reasonable rate for agricultural purposes where the security is satisfactory. Such a course would appear to be in their own interests, in the interests of the clients whom they represent, in the interests of the farmers and in the interests of the country to do so.

The early Indians of North America made beads from the shells of clams, fresh-water mussels, and abalone, and used the beads as a medium of exchange. It was called "wampum."

Junior: "What are distant relatives?"

Father: "They're the kind of people who call on you after making a long trip, and wish to avoid paying hotel bills."

Clever Men Beat Bank

Worked New System But Were Subsequently Caught

This stunt was revealed by an official of an important bank, victimized by the perpetrators, who since have been arrested. . . Two partners, ostensibly operating a legitimate business, opened a check account and deposited \$10,000. Within three months they had increased the fund to \$32,000, making the deposits in person, and getting to know the bank tellers. . . One partner then appeared, asking to cash a partnership check in the sum of \$29,458.27. The teller recognized the signature, okayed it, and then—as is customary—used the tel-autograph to ascertain whether a sufficient balance was on hand.

Simultaneously, the other partner appeared at another teller's window, asking to cash a \$29,458.27 check. This teller also used the tel-autograph, and the official upstairs wrote in reply: "Okay, okay, I told you it's okay." . . . The loss was more than \$27,000.—New York Post.

Eliminates Fire Hazard

Automatic Extinguisher For Airplanes Has Been Perfected

Fire is to be banished from aviation, according to British scientists who have been working for a long time on a new blaze-prevention system for airplanes. Reports received in London say an automatic fire-extinguishing arrangement has been perfected which makes it almost impossible for a machine to catch fire, either in the air or after impact with the ground. Extinguishers are fixed in vital parts, on the gasoline tanks, with jets leading to the gasoline pipes, over the engines, in the passenger cabins spring-operated automatic nozzles, and on the fuselage. They have spring-operated automatic nozzles which act if a bump exceeds the pressure at which the spring is set. Extinguishing liquid is sprayed even before fire can start and no flames can survive the action of this liquid.

Hypnotic Suggestion

Lecturer Claims It Is Wonderful Help In Dentistry

Students of the Royal Dental Hospital in London have had their teeth cracked, chipped, filled and extracted, all without anaesthetics—and all without pain. It's done by hypnotic suggestion.

"There is nothing mysterious about it," claims William Lovatt, who is lecturing on "hypnotic dentistry" in several large London hospitals, "it is a perfectly natural process and in no way harmful."

"A suggestible patient—and 70 per cent. are—has only to accept suggestions for anaesthesia and he can submit to the forceps or drill confident that he will feel nothing, either at the time or afterwards."

Experience with 3,000 cases, he says, has convinced Mr. Lovatt that the possibilities for hypnotism in modern medicine are enormous.

Lifted Tons Of Money

W. T. Dagger, of Blackpool, England, just retired from the Corporation service, has lifted over 300 tons of money in his 30 years of collecting from penny-in-the-slot meters. His collection, he estimates, has averaged \$90 daily in coppers, or about \$675,000 in 30 years. As \$5 in copper weighs just over five pounds his aggregate collection totals 302 tons.

AFTER EVERY MEAL

Using New Ceremony

Dominions To Have Special Part In King's Coronation

The British Dominions will have a special part in the crowning of the King, a cable to the New York Times from London, said. It adds that following the coronation next May, King Edward VIII. will make a tour of the Dominions.

"When Edward is crowned in Westminster Abbey on May 12, 1937," it says, "Canada, Australia, South Africa and New Zealand will receive positions in the ceremonies emphasizing their new importance as self-governing nations under the Statute of Westminster, enacted since the last coronation."

"In accordance with this statute, the King becomes not only ruler of the British Empire as a whole, but separately and distinctly King of the Dominions. A new ceremony will be prepared stressing this conception of the King as the direct head of each Dominion. Through the Dominions Office conversations have reached an advanced stage regarding the exact part the Dominions will play. The crowning of the King in this new form will be the prelude to a royal tour of the Dominions."

SELECTED RECIPES

ROLLED NUT WAFERS

½ cup "Crown Brand" corn syrup
½ cup butter
1 cup bread flour
¾ cup sugar

1 cup chopped walnuts, or peanuts
Heat the "Crown Brand" corn syrup to the boiling point, remove from heat and add butter. Then, slowly and stirring all the time, add the flour which has been mixed and sifted with the sugar. Now add the chopped nuts. Drop small portions from the tip of a spoon on a greased cookie sheet, 2 inches apart. Bake in a slow oven. These cookies can be rolled or just left plain.

Gliding In Stratosphere

May Be Possible According To Tests Made In Moscow

Gliders may be able to reach the stratosphere ere long, according to reports from Moscow. By a new method a glider may be towed to a great altitude, the towing wire then paid out until the glider is 6,500 feet above the towing plane. If a second glider is towed by the first and its line paid out it can ascend above the first. Thus a plane flying below the stratosphere can, by this flying "chain" tow a glider miles above it. Gliding Master Venslav has been making the tests.

Trying New Method

On three farms in Oxford county, Ontario, an experiment is in progress with a new method of preserving alfalfa. The crop is stored in the silo in green condition and treated with acid.

Working On Anti-Fog Ray

Marconi Is Busy Trying To Perfect New Invention

Were Charles Darwin alive, he would not agree with the dissipation of the dank vapor which assails Great Britain mainly during cold weather, for the famous naturalist's delight of London was founded in a fog.

He gloried in its "grandeur," as he said, and always looked forward to wintering in the metropolis, attracted by the prospect of a smoky mist. Although the origin of the species of town fog is the deadly smoke, harbinger of ill health, the Victorians suffered these visitations with no hope of a "cure"; but today scientists are having promising results.

Recently there have been many attempts to find the best method, and the outcome seems to be that future research will be centred around the aeroplane. The basis of experiments has been to spray chemicals down on the fog, and the mist will vanish if sufficient anti-fog mixture is used. Already headway has been made, but the drawbacks at present are the cost and lack of facilities, for a huge fleet of planes would be necessary to remove a yellow "peasouper."

The most recent anti-fog developments promise to end all this fog, however; in the midst of "war-ray" talk and the "mystery beam," which detects enemy ships and hostile aircraft fifty miles away, comes the report that Marchese Marconi is perfecting a great anti-fog ray.

When, or whether, this ray will mature cannot be said; but it would appear that a definite fog-dispelling invention of wide application will be available. It may be a ray, a powder, or chemicals. Everything depends upon the scientists.

Preferred More Dignity

Servants Of English Earl Did Not Like His Democracy

Many years ago we used to correspond with Auberon Herbert, the son of the fourth Earl of Carnarvon, who, although a vigorous opponent of socialism, was one of the most democratic of aristocrats. He was so democratic that he insisted on his servants sitting at table with him and his wife. His servants disliked his democracy so much that at the end of a week they gave him notice that they were going to quit.—The Argonaut.

Faster Speaking

It is interesting to have the testimony of George Emery (who has written 150,000,000 words in shorthand) to the fact that people speak much faster than they did; the average increase he estimates at something like 25 per cent. The coming of the motor-car seems to have affected the national rhythm. Even much of the music we hear is taken considerably faster than the composer intended.—London Observer.

Appleford's

Para-Sani

You'll save its modest cost before half the roll is used. That's because this heavy waxed paper keeps left-overs fresh, moist and flavorful. Ask for Appleford's Para-Sani because of the exclusive knife edge cutter on the box.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

Interesting Information About Moisture Conditions Necessary For Crop Growth

From 30 to 80 tons of water are required to produce one bushel of wheat under average western conditions, it was revealed by experiments conducted by E. S. Hopkins, Dominion field husbandman, and the late S. Barnes at the Dominion experimental station, Swift Current.

The conclusion as a result of the experiments conducted are given as follows:

(1) Under average western Canadian conditions, it takes from 1,000 to 2,600 pounds of water to produce one pound of grain. Or, in other words, it required from 30 to 80 tons of water to produce a bushel of wheat.

(2) An average summerfallow conserves probably about five inches of moisture. (This includes 1.5 inches conserved during the fall previous to the summerfallow). Then on the average an additional amount of about 1.5 inches is conserved during the fall immediately preceding the crop; then the average rainfall for the growing season, April 1 to July 30, in the west, is approximately eight inches. Therefore on an average "summerfallow" field a total of 14.5 inches of rainfall should normally be available for the use of the wheat crop.

(3) Winter snowfall adds but little moisture reserves, the reason being that the ground freezes before the snow occurs, then the snow melts, runs away or is evaporated before the ground thaws in spring.

(4) The roots of the wheat plant extend, under ordinary conditions, to a depth of between five and six feet in the soil.

(5) By harvest time, a crop of wheat, whether produced on stubble or on "summerfallow", has usually completely exhausted every scrap of available moisture in the soil to the depth of the roots, some five or six feet.

(6) The belief, held quite generally, that moisture moves continually upwards in the soil by capillary action, has been found to be incorrect. On the contrary it is discovered that the movement of moisture upwards to the surface is so exceedingly slow that it may be considered to all intents and purposes to be negligible.

(7) Rain falling upon the soil tends to move fairly quickly downward, the depth of penetration being determined by the amount of rainfall and the state of the soil at the time the rain occurs. Rain penetrates quicker when the soil is moist than when it is dry. The downward movement apparently continues, becoming slower with depth, but there is a tendency for the area penetrated to become equally saturated quite quickly.

(8) Once rainfall has penetrated the soil three or four inches, that is, to a level below the usual depth of disturbance by implements, atmospheric conditions seem unable to deplete the moisture. It is then apparently only given up by the soil through the medium of the roots of growing plants.

(9) A substantial percentage of the rain that falls is quickly evaporated into the atmosphere. This applies particularly to showers of less than a quarter of an inch. But a certain amount of rainfall is lost by evaporation with every rain. Loss from evaporation is one of the important reasons for relatively low yields of crops.

(10) Under average farming conditions, weeds also utilize a substantial percentage of moisture that otherwise would make wheat or other grain.

(11) Contrary to general opinion, wheat plants do not seem to be injured directly either by hot temperatures or drying winds. It is the lack of moisture, or the drought, that damages the plant. It has been noted that under very adverse conditions of heat and dry winds, crops that are irrigated do not suffer.

(12) Also contrary to general opinion, hot drying winds do not "lap up" moisture from the soil, the reason being that during such periods, the top or three inches of soil is already dry, and moisture that has penetrated below that depth is ap-

parently safe from the action of heat or winds. As already stated, most moisture is lost or "lapped up" by the atmosphere during or immediately after rains and not in dry spells.

(13) Until the wheat plant is from four to six inches high, it uses relatively little moisture. From this time on, until about the last week in June, the daily use increases. From April 1 to June 30, the plant normally has used much less moisture than on the average falls. Therefore, a reserve has been built up for use later. From the end of June, however, until July 30, the use of moisture by the plant proceeds at an almost incredible rate, the crop during this short period utilizing all the moisture the soil has previously stored up.

Tree Distribution

Ship Out Over 767,000 Trees In One Month

In April 1936 more than 767,000 trees were supplied free by the Tree Planting Division, Dominion Experimental Farms, Dominion Department of Agriculture, for rehabilitation plantings in the three Prairie Provinces. Over 77,000 trees went to 60 Illustration Stations and District Experiment Sub-Stations and 166,000 to members of Agricultural Improvement Associations. For field shelter demonstration areas about 460,000 trees were shipped to different centres. Conquest, Sask., took 389,150, Aneroid, Sask., 35,450; Porter Lake, Alta., 21,500; Lyleton, Man., 13,000, and the Kindersley, Sask., Municipal Tree Planting Project was supplied with 65,100 seedlings.

The planting of the trees in the different centres was done under the direction and supervision of members of the Tree Planting Division which has its forestry stations at Indian Head and Sutherland, Sask.

Tree planting is one of several measures in the program of Prairie Farm Rehabilitation which was begun under the Prairie Farm Rehabilitation Act early in 1935, designed to cope with the serious problems of drought and soil drifting.

Has Become A Habit

Ninety-Year-Old Woman Has Made 67th Ocean Trip

When the steamer Comorin docked at London recently, Mrs. Robertson Bull, 90-year-old Australian Scots-woman, concluded her 67th trip between Australia and Britain in 64 years.

In 1872, as a woman of 26, Mrs. Bull migrated with her family from Scotland to Australia. Every year since then, and sometimes twice a year, she has made the voyage between her Australian home and her birthplace. She likes sea travel because it helps her to keep fit. But this time this youthful-looking nonagenarian believes she will visit Scotland for the last time.

"What a difference, now and the old days," she exclaimed. "When I first went out to Australia with the family—I was one of 10 children—they were just trying out the steamships."

"We travelled in the Great Britain, a steamer which still used sails."

"Nowadays I do my physical exercises every morning on board just as I do at home. In that way I manage to keep fit."

Making Bricks From Waste

A process of making bricks of all colors from slag and waste products of the mining industry has been discovered by Lyndall Forse of Yeovil, England. Government departments have taken an interest in the discovery, and a plant is soon to be opened at Radstock in the Somerset coal-fields.

An Exact Science

So exact a science is navigation these days that on occasions captains have steered their great liners over the 3,200 miles between New York and Southampton or Liverpool entirely by dead reckoning—made possible only by the radio direction-finder. 2160

Danger Of Wheat Scarcity

Three Poor Crop Years In Succession In United States

The Biblical story of the seven lean years in Egypt which ate up the seven fat years is generally accepted as an allegory. But there is no need of going very far to see that it might be something more than that. The United States has had three poor wheat crops in succession, and the drought which has swept the northern plains during the last fortnight makes certain of a fourth. The crop of winter wheat is estimated at 473,000,000 bushels and the spring wheat yield, it is feared, will not run above 134,000,000. This will give a total of 607,000,000 bushels, which is considerably below the quantity needed for normal domestic consumption.

Not only is the United States crop small, putting the republic in the list of importing rather than of exporting nations, but the world surplus of wheat, according to the United States Bureau of Agricultural Economics, is the smallest in nine years. From a condition of embarrassment with wheat surpluses, the world has passed in four years to one where there is some danger that there may be scarcity.

A condition of scarcity, of course, means better prices, and prices on the exchanges are already on the way up. Better prices for wheat, Canada's major export, will mean better times in Canada better at least in the agricultural areas, which have suffered severely in the past few years both from poor crops and poor prices.

But this is not the sort of prosperity that can be enduring. If economic investigation has shown anything in the past decade, it has shown that the prosperity which comes to some out of the distress of others is at best an uncertain prosperity. The best sort of prosperity—the only hopeful sort—is that which is enjoyed by country and city, by employer and worker, by exporter and importer, pulling together and going up together.—Vancouver Province.

Find Old Secret Mint

Counterfeiter's Den In Hungary Where Silver Currency Was Made

A secret mint where false silver money was coined by a gang of counterfeiters nearly 2,000 years ago was discovered in the course of excavations at the lower Danube, near the Hungarian frontier.

Ruins of many Roman settlements were found till now in the valley of the Danube, but this is the first time that remains of the Roman underworld were brought to light. The discovery is particularly interesting because it shows that a considerable part of the ancient Roman coins contained in various numismatic collections, are forged ones.

Advance Made In Breeding Of Disease-Resistant Cereals Is Remarkable

"The Right Of Way"

One Never Knows What The Other Driver Will Do

In a general sense, when two cars are approaching an intersection, the car on the right hand side of the other has what is usually termed the "right of way." If your car has the "right of way" over another do not rely very much upon this fact as a haven of safety. The other driver may be careless or reckless in taking a chance of getting by. In any case, there isn't much money in having the "right of way." If there be a collision and your car is damaged, having the "right of way" is not security for the cost of repairs; and if there be loss of life, the "right of way" won't even pay the hospital bill, to say nothing of bringing that life back again. No, no, do not place too much reliance in a general rule of this kind. Drive carefully all the time, and do nothing else while you are at the wheel. If you must do something else, pull off the highway out of the line of traffic and stop your car, but be sure to drive while you are driving—nothing else. A motorist with 25 years' experience said: "I'm never afraid of myself, but it gives me the jim-jams sometimes trying to figure out what the other fellow is liable to do." This man has never been mixed up in an accident, quite probably because he drives, and nothing else, while at the wheel and constantly watches the other fellow.

When Man Gets Melancholy

People Seem Unable To Cope With Petty Ills

Man is powerless against small pains. He can feel a kind of pride in having broken his leg, but he can feel none in breaking a finger nail. He can bear the death of his wife with fortitude, but he cannot bear it heroically when she is stupidly mean to him. He has a certain catastrophe consolation if his house burns down, but has no consolation if his house is hopelessly ugly.

Melancholy, the severest grief of life, is a suffering from small causes. It is the severest because it does not give way before heroism; there are not heroic victims of melancholy. It is in any case a weakness, or rather a defenselessness in the face of petty ills.—Atlantic Monthly.

Lawyer—"Then your husband, I take it, is elderly?"

Client—"Elderly? Why, he's so old he gets winded playing chess."

So Cool--This "Open Air" Crochet

Household Arts by Alice Brooks

Charm in Each Easy Stitch of This Blouse

PATTERN 5272

She looks stunning (and so can you) in this dashing, crocheted blouse! See how prettily plain stripes alternate with lacy ones? The combination of stitches is very easy, as is each detail of this all-purpose style. Make it right away, in string or yarn! It's grand for summer or fall, and the plain crocheted skirt makes a smart two-piece! In pattern 5272 you will find complete instructions for making the blouse shown in sizes 16-18 and 38-40; an illustration of it and of the stitches needed; material requirements. Price 20 cents. In pattern 5353 you will find complete instructions for making the skirt shown in sizes 16-18 and 38-40; an illustration of it and of the stitches needed; material requirements. Price 20 cents.

To obtain these patterns send 20 cents each (40 cents for both) in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg News-paper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

The production of superior varieties or strains of field crops by breeding and selection has been an important function of the Experimental Farms Branch of the Dominion Department of Agriculture since the inception of the Farms system 50 years ago. Indeed, the progress made by the Cereal Division in the creating, testing, and final distribution of superior new varieties of cereals in Canada is an epic in the realm of scientific achievement. The names of such varieties as Marquis and Huron wheat, Laurel and Legacy oats, Charlottetown 80 and Mensury barley, Arthur and Chancellor Pease, and Novelty flax are not only household words in Canada but of world-wide recognition, while evidence of continued progress is contained in the recent intimation of the coming introduction of a variety of wheat which is capable of withstanding the ravages of stem rust.

In recent years the advance made in the breeding of disease-resistant plants has been truly remarkable. Not only have new rust-resistant and smut-resistant wheats been developed, but varieties of oats resistant to stem rust and smut have also been created. The progress in this particular, so far as the Cereal Division is concerned, has been due very largely to the policy of concentrating the work at strategic points under the direct charge of highly trained men. Thus, the problem of breeding disease-resistant types of wheat has been centralized at the Dominion Rust Research Laboratory at Winnipeg in the very centre of one of the worst rust areas of the West.

While the breeding of rust-resistant wheats and oats have more or less held the public stage, other work of far reaching importance has been quietly proceeding. There is promise of a successful conclusion to the development of varieties of oats which combine high strength of straw with disease-resistance and other desirable qualities; varieties of barley better adapted to different regions and more highly disease-resistant than the commonly grown types; and seed types of flax capable of producing more and better oil per acre.

In addition to these activities, the Cereal Division by Act of Parliament is required to investigate and report upon the eligibility of new varieties of cereals seeking a licence for sale in Canada. It also conducts verification tests of Elite Stocks and Registered Seed Stocks for the Canadian Seeds Growers' Association, as an aid to maintaining the high standards of varietal purity set for such stocks. The success attending the efforts of the Cereal Division has been made possible in no small measure by the existence throughout Canada of the Branch farms and stations at which much of the exacting work of testing and appraising varieties is concluded.

Problem Of Education

College Principal Makes Some Criticism Of Present Teaching Methods

Canadian children were "treated too much like parrots when all the time education is the development of life, personality and thinking," Dr. G. W. Kerby, principal of Mount Royal College, Calgary, said in an interview at Toronto.

Dr. Kerby, who attended the annual convention of the Canadian National Federation of Home and School Associations, of which he is president, considered the final examination method "detrimental to the personal development of the pupil."

"The problem of education is the problem of democracy," he said, "and the future of our Canadian democracy depends on whether we have an educational system which is a hard-and-fast, cut-and-dried, strait-jacketed affair or one that is a vehicle of life."

Midget Tree Bears Apples

A bearing apple tree exhibited by the Royal Horticultural Society, Westminster, England, was 18 inches high. One year old, the tree had been raised from a seed and bore four apples, which had a combined weight of 6½ pounds.

Westcott W.I.

The July meeting of Westcott Women's Institute was held at the home of Mrs. Ed Klinck, with nine members and ten visitors present. The meeting opened with O Canada and repetition of the Creed. Roll Call was answered by naming something learnt from two previous lessons on Home Nursing given by Nurse Johnston, of the Didsbury Hospital. Miss Johnston was present at the meeting and gave her third and final lesson, which was very helpful to all. The Institute thanked Miss Johnston for her efforts in their behalf. Mrs. MacFarlane gave her report on the Farm Women's Week at Olds. Entertainment consisted of a piano duet by Phyllis Hughes and her mother, a piano solo by Betty Klinck and community singing by all present. This was followed by the visitors judging the child's dress and pantie contest, 1st prize going to Mrs. Alex Robertson Jr. and 2nd prize to Mrs. Jimmie Hughes. "God Save the King" was sung and lunch was served by the hostess. The August meeting will be held at the home of Mrs. J. Hughes.

Thank You!

I take this means of expressing my sincere thanks to my friends and neighbors for their many acts of helpfulness, gifts and cheery visits, which helped to shorten and brighten many otherwise tedious hours — Mrs. DAVE SINCLAIR

LEFT—For Trucks—The new Goodyear Lug Tread that bites deep with a caterpillar action—then cleans itself as it revolves.

BELOW—For Cars—The new Goodyear Studded Tread proven by tests to pull a car through the worst possible conditions—from gumbo roads to deep snow.

TWO NEW TIRES

to keep wheels MOVING

Where the going is hardest these tires will pull you through while other tires slip, clog, stall and let you down.

The Lug Tire is designed for trucks, tractors, graders, etc. It gives maximum traction forward and backward in deep mud or snow without sacrificing smoothness, comfort and silence on im-

proved roads. The Studded Tire is designed for the cars of farmers, doctors, mail carriers or for anyone whose duty takes him into the mud and clay of unimproved roads and into snow on any road.

Come in and let us show you these remarkable new Goodyear Tires.

With its wonderful grip the Goodyear Lug Tire pulls through mud or gumbo.

Unless axle actually buries itself the Studded Tread Goodyear will pull through the worst of roads.

In snow the Goodyear Lug Tire avoids delays, protects loads, allows faster, safer speeds.

New Locomotives Poems in Steel

Canada's newest railway locomotives are poems in steel, graceful, light-weight, semi-streamlined, machines capable of 110 miles an hour.

Radical departures in construction have been made in the Canadian Pacific Railway's five new "3000" engines, the first of which was taken over on Monday, July 27, at a brilliant ceremony which was broadcast on a nation-wide radio network through the facilities of the company's Communications Department, and which included addresses by Sir Edward Beatty, G.B.E., K.C., I.L.D., chairman and president, Canadian Pacific Railway; His Worship Mayor Camillien Houde of Montreal; William C. Dickerman, president of the Montreal Locomotive Company, where the new locomotive was built; and J. N. Burke, Canadian Pacific veteran.

The new Jubilee Locomotives, so named because they will go into operation in the jubilee year of the company's transcontinental passenger service, will pull a completely new type of train, lighter than the ordinary, semi-streamlined, and comfortable. The new coaches are under construction.

Rugby Notes

The August meeting of Rugby W.I. was held at the home of the president, Mrs. Evans. There was an attendance of 23. Mrs. C. Youngs gave a full report on the Constituency Conference. The two delegates to Olds, Mrs. Wahl and Mrs. Hogg, reported a wonderful time and told many interesting items. Mrs. H. Hosegood took the monthly talk on the League. A paper on "Immigration" by Mrs. Hosegood was followed by a very full discussion, which concluded a very busy afternoon. The meeting then adjourned and lunch was served.

On August 3, Miss McIntyre, of the O.S.A., held a rug making demonstration in Rugby School. Twenty-six ladies attended, all thoroughly enjoying Miss McIntyre's practical and interesting lecture.

Receives Data on New Weeds

The secretaries of the municipalities have received letters from the Department of Agriculture pointing out that three comparatively new weeds are getting a foothold in this part of the province, viz: Hoary Cress, Leafy Spurge and Russian Knapweed. Charts and plates describing the weeds may be seen at the municipal offices and there are also leaflets covering the method of eradication for distribution to the farmers.

Shooting Season for Migratory Birds

The National Parks Service of the Department of the Interior, Ottawa, has just issued the Regulations regarding Migratory Birds for the current year.

A summary of the Regulations as they apply to Alberta follows:

OPEN SEASONS

Ducks, Geese, Coots, Rails or Snipe
In that part of Alberta lying north of the Clearwater and Athabaska Rivers: from noon September 1 to and including October 31, both dates inclusive.

In that part of Alberta lying south of the Clearwater and Athabaska Rivers: From noon on September 15 to and including November 14, both dates inclusive.

CLOSED SEASONS

There is a closed season throughout the year on eider ducks, wood ducks, swans, cranes, curlew, willets, godwits, upland plover, black-bellied and golden plover, greater and lesser yellow-legs, avocets, dowitchers, knots, oyster-catchers, phalaropes, stilts, surf-birds, turnstones, and all the shore birds not provided with an open season in above schedule.

The possession of migratory game birds killed during the open season is allowed in Alberta until March 31 following the open season.

BAG LIMITS

Ducks 12, geese 5, coots and rails 25, wilson's or jack-snipe 25, and not more than 100 ducks or more than 25 geese in one season.

The use of automatic (auto-loading), swivel, or machine guns, or battery, or rifle, or any gun larger than number 10 gauge is prohibited, and the use of any aeroplane, powerboat, sail boat, live birds as decoys, night light, and shooting from any horse-drawn or motor vehicle is forbidden.

The shooting of migratory game birds earlier than one hour before sunrise or one hour later than sunset is prohibited.

The penalty for violation of the migratory bird laws is a fine of not more than three hundred dollars and not less than ten dollars, or imprisonment for a term not exceeding six months, or both fine and imprisonment.

WEEKLY JOKE

"Riches take unto themselves wings," said the teacher, "and swiftly speed away. Can any boy tell me what kind of riches are meant?"
"Yes'm," answered the fan-eared little fellow, "ostriches."

A Good Record.

Mr. S. L. Bosomworth, of Carstairs, a consistent exhibitor at the Didsbury Fair, is very proud of the record of a Clydesdale mare born in 1919 and which has been exhibited since 1929. In 1929 and '30 she took 1st prizes in the Agricultural class; 1932, first in a class of ten; 1933, first in Heavy Draft class; and again in 1936, 1st in mare with foal at foot. One of her sons took prizes, as a 1, 2 and 3 year old; and 1st prize in 1933 in the Agricultural class. Another son took 1st this year as an Agricultural yearling.

Besides being good in the show ring, this old mare has worked consistently on the farm.

Navy League Does Valuable Work

Rallying to support the Navy League of Canada in its work of assisting the widows and orphans of men of the Merchant Marine and their dependents, maintaining Sailors' Homes and Institutes, etc. in our Canadian ports from coast to coast, looking after the welfare of the seamen when ashore, training boys and young men and helping to make better Canadian citizens of them, the citizens of Didsbury subscribed \$10.25 to this cause in a recent campaign here conducted by Fred Cooke, organizer of the Alberta Division.

Analysis is Basis of Fertilizer Value

Despite any selling talk to the contrary, the main basis value of a commercial fertilizer is its analysis in plant food, that is, its nitrogen, phosphoric acid or potash content. It frequently comes to the notice of the Fertilizers Division, Seed Branch, of the Dominion Department of Agriculture, that salesmen, in those parts of Canada where fertilizers are not well understood, try to sell fertilizers that are not eligible for sale under the Fertilizers Act, or offer a low grade at about the same price as a higher grade fertilizer. Farmers and other buyers should be on guard against this.

For example, a superphosphate containing 16 per cent available phosphoric acid is worth proportionately less than one containing 20 per cent, and the triple superphosphate containing 43 per cent available phosphoric acid has more than twice the content of plant food and therefore in dollars and cents is worth more than twice as much as the 20 per cent superphosphate per ton. Each of these grades of superphosphate is being offered for sale in Canada at the present time, and should be bought on the basis of its available phosphoric acid content, not just as fertilizer.

The same basis of valuation should be employed for all other fertilizers, whether they be mixtures or single materials containing one of the three main plant foods, nitrogen, phosphoric acid and potash. Whenever doubtful as to the value of a fertilizer buyers should communicate with the officers of the Dominion Seed Branch which enforces the Fertilizers Act.

BRIEFLY TOLD

Two hundred persons who were mentioned in the king's birthday honors list on June 23 were received by His Majesty on July 14.

Hon. J. E. Michaud, minister of fisheries, left for the Pacific coast on a study tour of the British Columbia fishing industry.

Pan American Airways was reported to be preparing to start carrying the first paying passengers across the Pacific in its big clipper ships.

Dawn to dusk flights across the Caribbean Sea, putting parts of South America within 24 hours of New York and Chicago is now in effect. Pan American Airways announces.

Prime Minister Baldwin told a large deputation from both houses of parliament that he could not at present promise to initiate any legislation for reform of the house of lords.

Construction of the Bank of Canada head office building will start next spring, it was announced at Ottawa. The building will be four or five storeys high and will cost at least \$500,000.

To be prepared in the event health insurance is introduced in Ontario, the Ontario Medical Association is working on a plan to determine cost of administration, Dr. W. K. Colbeck, president of the association, said.

Concern over the divergent foreign policies of Great Britain and the dominions was expressed by Lieut.-Commander Reg. Fletcher, Labor, who asked the government to call a conference of the members of the British Commonwealth to outline a common program.

An exhibit of Canadian prize wheat grown by Herman Trelle of the Peace River district, was officially opened at Stanley park by Mayor G. G. McGeer as the latest addition to Vancouver's many golden jubilee attractions.

King Edward turned over the proceeds of the sale of the gear and fittings of his late father's yacht Britannia, amounting to \$5,000, to the lord mayor of London as a contribution to the King George memorial fund.

After Many Years

Man Paid Back Money Which Lender Had Forgotten

Robert Sturges, optician of Troy, New York, said his faith in humanity is justified. Nine years ago a man came into his business office and was fitted with glasses. Three weeks later he came back—to borrow seven dollars to get a friend out of jail. He proposed to repay the money "at the first opportunity."

Just recently a stranger walked into the store and told Sturges, "I've come to pay you back the money I borrowed." It took a lot of explanation but finally Sturges recalled the loan.

House Trailers De Luxe

Have All Comforts Of Home And Bring High Price

House trailers for motorcars have become so popular that there are 250,000 of them in use and they sell as much as \$14,000. These de luxe models have all the comforts of home, including mahogany paneling, separate beds for six, electric light plant, electric refrigerator, hot and cold running water, ice water, insulation from the heat and cold, telephone connection with the driver and even air conditioning equipment. —Collier's.

Dr. Arthur H. Compton, University of Chicago savant, suggests that cosmic rays do not come from far off space, but from the earth's own atmosphere, many miles above our heads.

Pioneer Of Western Canada

Oldest Man In Saskatchewan Dies In 106th Year

Murdoch McLean, Saskatchewan's oldest man, died at the farm home of his son, John, in Moosomin district, Saturday, July 11, in his 106th year. Born at Loch Torridon, Scotland, Feb. 20, 1831, he emigrated to Canada while still a young man. He married Annabel McKenzie 52 years ago, and settled in the Iona district southwest of Moosomin, one year after the wedding. Thirteen years ago he lost all his possessions in a fire. Shortly after he retired and moved to Moosomin. Last year he and Mrs. McLean took up residence with their only son on his farm near town. Though his eyesight and hearing had failed in recent years, he took a keen interest in national and local affairs up to the very end.

In the old land Mr. McLean was a fisherman. Born during the reign of George IV., he lived during the reigns of William IV., Queen Victoria, Edward VII., George V., and at the time of his death was a loyal subject of Edward VIII. He was a life-long adherent of the Presbyterian church, and at the last election cast his vote for the Liberal party. He neither smoked nor drank.

Compensation For Colonies

South African Defence Minister Urges It For Germany

Oswald Pirow, defence minister for the Union of South Africa, stated at Pretoria, on his return from London, that "there can be no permanent basis for a peaceful agreement unless Germans are given adequate compensation for their colonies."

This meant, he added, in an interview with Reuters, territorial compensation "not anywhere on the face of the globe but in Africa. I found a lot of support (in London) for the view that Germany's co-operation in Africa is vital for the maintenance of white civilization on the continent."

Long Electioneering Trip

Musher Starts 5,000-Mile Tour Seeking Auditor's Job

Alexander Malcolm "Sandy" Smith, noted northland musher and explorer, began electioneering over a bailiwick averaging one voter to 11 square miles. He set himself a 5,000-mile tour over the territory in Alaska.

Smith, who was with the Wilkinson Polar expedition and who won a medal for rescue work in Hudson Bay territory, is an Independent candidate for territorial auditor.

On his tour he will make use of almost every form of transportation known in the north—airplane, dog team, raft, automobile and boat.

A Family Heirloom

Lunch-Basket Made In Germany Is 150 Years Old

A family heirloom, 150 years old, in the form of a lunch-basket of a type still used by fishermen in the countries bordering on the North Sea, has come into the possession of Mrs. Charles Ross, Prospect street, Tilbury, Ontario.

The basket, which has been handed down from generation to generation, was made in Germany, the home of her ancestors, and is in almost perfect condition.

It is made of straw, firmly-woven, stained and varnished and has a cover joined to the basket with straw hinges.

The Duke of York was installed an affiliated member of Glamis, Forfar, Masonic Lodge by James Beattie, the village postman, who is a Right Worshipful Master of Glamis Lodge.

As it ages, brick mortar becomes harder. 2160

Assisting Nature

By JACK MINER

Jack Miner, the Canadian Naturalist, sets out in this article the fact that man has, "Dominion over all."

During the past year I have read a number of articles, both in magazines and newspapers, as well as many letters that have come to me, on the subject of "Nature's Balance," decrying actions or systems on the part of man which the writers described as "Interfering with Nature," "Upsetting Nature's Balance," and so on. To all who adopt that attitude I should like to put myself on record to the effect that, personally, I believe the so-called "balancing" of Nature was left entirely with man, and that I believe in assisting Nature for the benefit of humanity. God created everything, every thing, and then He created man "in His own likeness and gave him dominion over all"; that is, as I understand it, the power and authority to manage everything here on earth.

Look, for instance, at the animal world, with the live stock in the farmer's barnyard as example. Did God create the Jersey cow, and the Holstein, and the Hereford? No. He gave man the original stock and then God, through man's instrumentality, developed many breeds, some for the high cream content of their milk, some to produce the greatest quantity of milk, and some as the best beef cattle. All have been on the earth a long time, of course; but their differences are the result of man's management. And, remember, man had to interfere with Nature to develop them.

Much the same thing is true of the horses, different strains being cultivated for particular purposes, such as the Clydesdales and Percherons for heavy draught work, and the blue-blooded descendants of original Arab stock for racing.

Recently I was in some of the southern United States, where the character of the farm work to be done is too heavy for the common ass, yet where the climate is too warm to permit of the horse doing its best. In that part of the continent, therefore, man has crossed the ass with our common horse and produced a beast that withstands the heat and is also strong enough to do work of tilling the soil. Yes, he has developed the mule. But the mule kicked and, so far as I know, has gone no farther.

In poultry, if you trace back the various species it is very easy to see that it has been the work of man that has developed the different breeds, Leghorns, Brahmas, Minorcas, Plymouth Rocks, and so on, some of which are especially valuable as layers, and others as food. Our much-prized turkey is nothing more nor less than the wild turkey, domesticated and improved.

Seventy-five years ago our Canadian North West was grazed by millions of wild buffalo (Bos bison). Then came the white man who, realizing the value of the fertile soil, established a park where a herd was placed to preserve the species from extinction, slaughtered the great roaming herds and, turning the land upside-down, made it into one of the largest and most valuable of earth's great wheat-fields, with towns and cities and stately governmental buildings dotted here and there across its vast expanse. Remember, though, that in order to bring about this state of things, man had to "in-

terfere with Nature" as some would call it.

And speaking of wheatfields, wheat has been man's favorite food for centuries. Yet wheat, even as it was being grown in Canada in comparatively recent years, had certain weaknesses, it had to be planted in the fall and did not always survive the severity of the western winter; it was not producing as abundantly as seemed desirable; it did not mature rapidly enough always to escape the early Autumn frosts. Then came to our aid such men as Professor Charles Saunders, now Sir Charles Saunders, cerealist, of Ottawa, and by study, experimentation and the rigid selection of choice strains developed a wheat that could be planted in the spring, that would yield several bushels more per acre than had been the rule previously, that would mature within a certain period of time, and that yet retained all its former qualities. We have today the Marquis and the Garret and other species of wheat, developed by man. God created the original, the germ; but man was given, and has used, the power to develop, manage and control it.

Or if you will consider your flower garden, look at the Iris. Gave gave to us in America a little, insignificant flower growing along the banks of streams, which we called, commonly, the "flag". From it man has developed Irises that grow three or four feet in height, varied in color, and some giving out an exquisite fragrance. But man had to interfere with Nature to accomplish this. Or take the rose. Did God create the American Beauty rose? No. He gave man brains, and a little old wild rose which served as the germ, so to speak. Today, through the efforts of outstanding botanists, man has been given flowers of beauty and fragrance, as the Creator intended should be done.

But let us look at another side of the question. At the same time that God created the little wild rose, He created also the weed, typical of which is the Canadian Thistle. Still he gave to man the brains and the means of controlling these also, so that they may be restrained from predominating the plant world.

If you are raising poultry, or other bird life, valuable to humanity, and hawks, owls, weasels and other vermin begin to destroy and live on the birds, and you fail to take a gun and shoot these pests, then you are not using the brains God gave you.

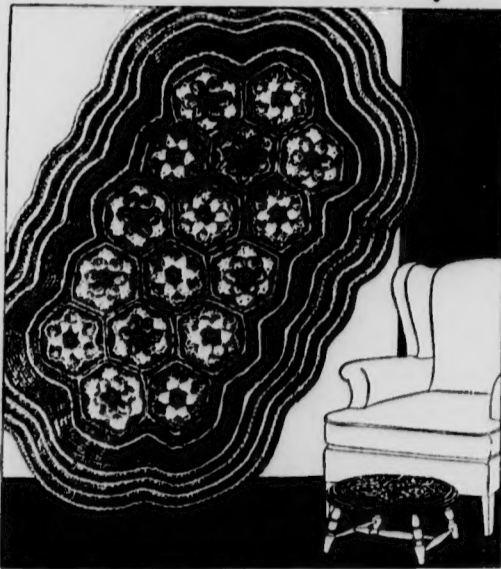

As for me, I thank God for all He made, for the raw materials He gave us with which to work; that He made us in His own likeness, after His own image, and endowed us with sufficient brains to develop those raw materials and keep on discovering and bringing within reach of us all the blessings He created.

Not Done In England

Ladies Do Not Wear Hats In Hotel Dining Rooms

"You can't wear that hat here!" said the head waiter at one of London's most fashionable hotels. Hedda Hopper, American actress, reputedly one of the best dressed women in Hollywood, looked up in astonishment. "Why not?" she demanded, hastily feeling the offending bonnet to find out if something had gone askew. "It isn't done—not in England," said the arbiter of decorum. "No hats in the dining room." "It's silly," she said, afterwards. "Hats are the rage for evening in America. They're bound to be here sooner or later." But Hedda had to take it off.

Bright Crochet For Any Room

Household Arts by Alice Brooks

Use Up Your Scraps of Wool

PATTERN 5544

Take stock of your rooms! Are there dull spots that might be brightened with a colorful rug, footstool or pillow? Here's an easy way to crochet all three in rug wool, rags or candlewicking. Do a number of the sturdy, six-sided medallions, their flowers all colors 'gainst a uniform background. Join them, and crochet a dark border round and round, relieving it with colored stripes. In pattern 5544 you will find complete instruction for making the rug shown; an illustration of it and of all stitches needed; material requirements; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

"I am surprised at you. You know KEEN'S is the best." "Well, I thought when I was putting up my pickles I could save some money by buying cheap mustard. But never again! Cheap mustard has not the flavour, the strength nor the keeping quality. I've learnt my lesson. It pays to buy the best—KEEN'S D.S.F. MUSTARD."

Made from seed grown in the Fens of England. Shells or hulls are removed and only the inner part of the seed is used. Superfine grinding ensures the full mustard flavour.

In original tins for as little as 10¢

Where Britain Leads

Largest Trading Country In The World In 1935

Great Britain was the biggest trading country in the world in 1935, according to the monthly bulletin of statistics issued by the League of Nations. Britain's imports plus exports comprised 14.2 per cent. of the world's total trade last year. The second place was occupied by the United States with 11 per cent. Germany was third with 8.7 per cent., and France fourth with 6.2 per cent. Canada and Japan followed with 3.6 per cent. each. In view of Japan's aggressive economic and financial plans designed to capture trade in recent years, the Canadian showing may well be regarded as excellent. The shares of world trade last year enjoyed by two sister dominions, South Africa and Australia, were respectively 2.2 per cent. and 2.1 per cent.

In 1929 the nations ranked in the following order in their percentage of world trade: United States, Great Britain, Germany, France, Canada, India, Japan, and the Netherlands. Twelve nations, excluding Italy, for which complete trade statistics are not available, accounted for 62.3 per cent. of the total world trade last year.—Calgary Herald.

Will Work Together

Canada And United States Co-operating In Weather Check

Canada, it was disclosed, will co-operate with the United States in aeroplane observation of the upper air with a view to increasing accuracy of weather forecasts.

Canada flights will be made from Fort Smith, N.W.T., on the Slave river. Planes will carry observers who will work at altitudes of about 17,000 feet.

The work will be under direction of Dr. John Patterson of Toronto, chief of the Dominion meteorological service, department of marine. It is expected observations will produce information adding to the safety of aircraft operation.

Noiseless Marble Floor

Plastic Rubber Surface Is Skid-Proof And Easily Cleaned

A process for the use of plastic rubber in place of cement in the laying of jointless terrazzo floors has produced a noiseless marble floor.

Chippings of marble mixed with plastic rubber produce a compound which is easily laid in a semi-fluid state and is adhesive to wood, concrete, steel or a cork underlay.

Its wearing qualities are claimed to be equal to those of cement terrazzo, and the plastic rubber surface has the advantage of being skid-proof and easily cleaned.

Public Will See Television

Several of London's leading stores have engaged architects to design "viewing rooms" where the public can see the B.B.C. television programs. These rooms are being elaborately designed and furnished and will hold 25 or more people.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks pink.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

Thou Shalt Not Love

— A NOVEL BY —
GEORGIA GRAIG

CHAPTER I.—Continued

Starr had not realized that her tempestuous words had been spoken aloud until the man's voice interrupted. It was a crisp, pleasant voice, with a lazy, amused drawl. She whirled around to face him, hands gripping her handbag tightly as the nearest support.

The man had detached himself from the careless crowds, and stood not far from her elbow, indolently leaning against a corner of the show window frame. He was looking down on her with quizzical gray eyes that held a glint of humor in their depths. For that first startled moment Starr's complete vision was filled with him. He was tall, handsome in a bronzed, broad-shouldered slim-waisted way, with a physique that bespoke the owner's pride of its possession in its care. He wore dark, smartly tailored clothes which were unerringly placed in their category of good taste. Money, too, of course. That he was accustomed to that as to the air he breathed was in his slightly arrogant features, features which had just the proper tinge of hardness to give him an air of interesting masterfulness.

The smile of tolerant—or was it condescending?—amusement curved his lips more widely as he looked straight into Starr Ellison's upturned face, from which the eagerness of her passionate plea had not fled.

"So you want to play, do you?" he repeated, with maddeningly slow emphasis.

Starr could not understand why

on the instant she was not annoyed at his intrusion, or his very apparent fibing. Such a short time ago the Starr Ellison she had always known would have thought furiously: "Masher!" and one look would have been a crushing retort to him.

Today it did not matter. Such things were of so small account. Nothing mattered, anyway. Everything was an affair of relativity. Things were important only because of the bearing they had on your future. With barely six months to live, which could be considered practically no future at all, what did it matter what she might say or do? What anyone else in the world might say or do?

Even though she was surprised at herself, steadily Starr returned the contemplative scrutiny of the gray eyes that were amusedly regarding her. She placed him. Readily. The man before her represented that gay, smart world she had never known, for which she had yearned—the other half of the world which knew how to play. He had taken advantage of the opportunity. He stood for all she had lost in life and could never hope to attain.

She cried out at him suddenly, her eyes blazing at him as though she were, through him, hurling her defy to earth and heavens:

"Yes, if you must have it! More than anything else in this wide, wide world, I want to play!"

The smile in his eyes was tauntingly on his lips, as he drawled:

"That, I should imagine, should be something not too hard to arrange—"

But, aghast at herself, Starr was backing away, long lashes dropped over her confused eyes. What had she done? Unnoticed she backed into a passerby. The gray-eyed man's hand went out to touch her arm.

"Wait a minute," he said. "We ought to talk this over a bit, hadn't we? There's no hurry. . . ."

His smile was friendly. "The Arabs, you know, have a saying: 'What is there to hurry for? We are all going the same way. Why should we try to pass one another? Let us enjoy today, for today will never come again. . . .'" Of course this isn't Egypt, but—

He stopped short at the look of blazing fury in the depths of the girl's dark, mysterious eyes. Her voice was a flame at him.

"I hate Egypt!"

Then she was gone, flying up the avenue, losing herself in the crowds, never looking back. Michael Fairbourne stood staring after her. Then he grinned and shrugged as he lighted a cigarette and moved carelessly along the street.

"Seem to have dubbed my shot again, eh?" he murmured. Then he glanced along the street as if again seeing the black-eyed girl with the camellia skin. "Still, I'm wondering a little—"

CHAPTER II.

There was no good reason for Starr Ellison to be on Fifth Avenue that cheerful early Autumn mid-day. Only that it was not Sixth Avenue. Nor was there along it any employment offices, wordlessly insisting on her need for job hunting in the sordidness.

After her visit to the doctor, with whose smiling assistant she had, incidentally, left the greater part of her small remaining store of cash—for the privilege of being told she had only six months more of life—such small and distasteful matters as searching for a job appeared of small moment. Especially when there were no jobs. Why keep on hunting for one by which she could merely keep the breath of life in her body for six months more? It hardly seemed worth while.

Such thoughts were in Starr's mind as she fled along the street after her tempestuously uttered rebellion against Fate in the atmosphere of the prosperous Avenue. Nevertheless, she mechanically turned at the next corner and sought the street made clamorous by the El overhead, and headed for the agencies which were on her list and not already tried that day. She couldn't be a quitter entirely, she supposed, even if she had so short a time to fight. Work was most necessary at the moment. Vitally so, for she had a most distasteful memory of her seance that morning with the keeper of her rooming house. A dreary, hopeless kind of place it was, but Mrs. Maloney who kept it, had made it quite plain to Miss Ellison

His Majesty's Portrait FREE

Copyright—Bassano

THE makers of Bee Hive Golden Corn Syrup and Durham Corn Starch are happy to offer to their friends throughout Canada a handsome two tone reproduction of His Majesty, King Edward VIII. The portrait, (by Bassano) is one of the most recent and has been specifically designed for framing, measuring approximately 9" by 11". It is restrained and dignified and when framed will blend in perfect taste with the furnishings of the finest room. Many well deserved compliments have been received on the beautiful appearance of this portrait.

ST. LAWRENCE STARCH CO. LTD.

How to Secure Free Portrait

• Send in one Bee Hive Golden Corn Syrup label and one Durham Corn Starch label with your name and address written clearly on the back of either label, along with the words—"King's Picture." Mail to the St. Lawrence Starch Co. Limited, Dept. 8, Port Credit, Ontario and your free portrait will be forwarded promptly.

HIGH SPEED TIRES

that she had waited for her rent quite long enough, and that while she was right sorry that Miss Ellison couldn't get a job, there were plenty of other people in the same fix. After all, Mrs. Maloney's was not an eleemosynary institution. In other words, Mrs. Maloney had conveyed to Starr that if she was prepared to pay her three weeks' arrears of rent that she could have her clothes. Otherwise—

None too pleasant a prospect, and it was beginning to look like a rough ride ahead for a girl who, at most, had in her purse only enough for lodging for a night or two somewhere without baggage. Even if she were going to pass out in six months, in the meantime, she supposed, she would have to sleep somewhere.

A wry smile crossed Starr Ell-

ITCHING

TORTURE STOPPED in one minute!
For quick relief from the itching of pimples, blotches, eczema, athlete's foot, rashes and other skin eruptions, apply Dr. Dennis' cooling, antiseptic, liquid D. D. D. Prescription. Its gentle oils soothe the irritated skin. Clear, graceful and stainless—dries fast. Stops the most intense itching instantly. A 35c trial bottle proves it—or money back. Recommended at drug stores for forty years. Ask for it! 19

D.D.D. Prescription

son's lips as she rushed along. She—she!—who didn't know where she was going to sleep that night, had been wasting her time on Fifth Avenue, rebelling against not having a taste of life. She had been wanting to play!

She didn't know that noon had come, and forgot that her breakfast had been a doughnut and a cup of coffee until she suddenly realized that the crowds who were jostling her, elbowing her, were making their way into the rows of eating places that sat cheek by jowl along the cross street. She stopped still before one of them, drawn irresistibly by the sight of the good things to eat temptingly displayed. Another show window!

She forgot that she was hurrying to look for a job, forgot she had wanted to play, forgot even for that minute what that doctor had told her, as her eyes widened at sight of the food, and then swept on further to the people at the tables. In her eyes was an expression of looking upon some amazingly absorbing scene, but it was no more upon which she gazed than the vista of food and warmth that spread out in one of those restaurants which not so long ago Starr Ellison would not

have bothered to give a passing glance.

Two prosperous looking business girls were having their luncheon near the window—a substantial meal, with a steak that was simply oozing butter gravy, new peas and the crispest looking salad.

reported to police today that \$300
had been stolen from his person
while visiting in the city Monday
night.—Calgary Herald.

LOCAL & GENERAL

Mrs. Clarke, Bruce and Lorna are
vacationing at Sylvan Lake.

Frank Raymond spent the week-
end visiting his home at Lacombe.

Mr. and Mrs. A. R. Kendrick
spent the weekend at Sylvan Lake.

Miss Dorothy Ranton, who had
been visiting relatives at Edmonton,
returned home Monday.

Mike Schuler, who has been
working at the Pep Groceteria for
the past few months left on Saturday
for Calgary.

Mr. Seth Halton, of Pincher Creek
is visiting his brother, J. W. Halton
and family.

Eddie Clemens, of Calgary, visit-
ed his parents, Mr. and Mrs. M. B.
Clemens this weekend.

Harold Hardy left on Sunday for
Vancouver where he will visit his
brother and other relatives.

Mr. W. A. Austin, Elizabeth and
Miss Lois Edwards are spending a
two weeks vacation at Sylvan Lake.

Mr. J. A. McGhee is continuing
vacation fishing in the west country.
He is accompanied by Mr. W. Smith.

Mr. and Mrs. J. W. Halton and
family visited the former's brother
at Lacombe this week.

Knit Your Fall Sweaters & Suits

has been engaged as teacher at the
Clovermount School for the ensuing
year.

Miss Maisie Sinclair and young
sisters returned Sunday from a
week's vacation at Sylvan Lake.

Mr. Harold Clemens, of Edmonton
is spending a two weeks vacation,
visiting relatives at Didsbury and
Bergen.

Try T. E. Scott for all lines of
Men's Work Clothing.

Mr. and Mrs. Irwin Klein returned
Thursday last from their seven
weeks' vacation at Kansas, where
they visited relatives.

There was a game of penny ante
in town the other day and a prosper-
ity bond was in the game. They
say it was hot money as no one
wanted to keep it.

Gordon and Murray Caithness who
were with the Premier Concert
Boys' Band, playing at the Vancou-
ver Golden Jubilee Celebrations,
returned home on Saturday.

Bob Eubank, Norman McLeod
and Art Reiber drove to Sylvan Lake
to see the colored boys play ball.
As only one team showed up they
were disappointed.

We sell Treen's Gloves and Car-
hart's Overalls. There are no better
makes.—T. E. Scott.

Mr. and Mrs. Wendel Gochee and
family are spending their vaca-
tion in the Sundre district, visiting
the Hale Gochee family and other
friends.

P. Miquelon is in charge of the
C.P.R. Depot while agent J. A. Mc-
Ghee is on his vacation. He is
being assisted by J. Rushton of Cal-
gary.

Mr. and Mrs. W. Sutherland of
Ponoka are visiting with the latter's
mother, Mrs. George Smith. Mr.
Sutherland had been attending Sum-
mer School at the Technical School, Cal-
gary.

Mr. Ross Ford, who has been
attending Summer School at the
University of Alberta, returned home
last weekend. We are informed
that he passed his departmental
examinations with high marks.

Mr. and Mrs. Rindall, who were
accompanied by Mr. Bob Springay
of Elkton, returned home last week
from a motor trip to Victoria and
Vancouver, B.C. On their return,
they visited such points of interest
as Seattle and Everett, Washington;
Portland The Dalles, and also Dufur
Oregon, where they surprised their
eldest daughter by paying her and
her family an unexpected visit.
They returned home via Spokane
and the National Banff Park.

For Comfort and Good Wear in
Shoes, buy from T. E. Scott.

Mr. and Mrs. Chester Hale, of
Edmonton, are visiting the Ranton
home. Mrs. Hale is a niece of Mrs.
Ranton's.

Mr. and Mrs. Sam Lee, who ar-
rived from China last week, have
taken up their residence in the Pet-
ersen Block.

Arthur Boorman, Harold Erb and
Jack Stock, of Hanna, cycled to
Bergen and back on Sunday.

Mrs. H. D. Booker, who is an
enthusiastic beekeeper, went to La-
combe on Monday to attend the bee-
keeper's field day.

Mr. and Mrs. Morrow motored
from Lethbridge on Tuesday to visit
with the latter's parents, Mr. and
Mrs. H. M. Reiber, for a few days.

Miss Joyce Morgan, of the local
post office, is spending her vacation
with Mr. and Mrs. Dave Hughes at
Elkton.

Mr. Tom Johnson went to Calgary
on Monday to take his barber's
examination. Messrs. Jack McCloy
and L. Frey took their exams on
Tuesday.

The meeting of the Pioneer S.C.
Group which was to be held at the
home of Mrs. Maak Monday eve-
ning, was postponed on account of
the registration and will be held at
the same place on Monday evening
next.

Miss Bea Kendrick returned from
Edmonton on Friday where she had
been attending Summer School. She
left on Tuesday for Drumheller
where she will act as bridesmaid to
Miss "Ted" McKay, who will be
married on Saturday.

Wanted: One Thousand Prosper-
ity Certificates in exchange for
Merchandise and we will accept
them at par.—T. E. Scott.

Mr. Harold Parker, of Ottawa,
who has been making a topograph-
ical survey in the mountains, visited
his cousins, Messrs. Tom and Jim
Morris, over the weekend. He was
here during the hail storm which
he said reminded him of the barrage
over Vimy Ridge.

At the home of Mrs. Lowrie, on
Tuesday evening, twenty-five young
people of the town entertained in
honor of Mr. and Mrs. Sam Lee in
honor of their marriage, which took
place in China early in the year and
their arrival last week to reside in
Didsbury. The happy couple were
presented with a beautiful radio
lamp in honor of the occasion. Dan-
cing was enjoyed and a delightful
lunch served.

Two Tents for Rent; apply to

IN MEMORIAM

LIZZIE (SHELLY) BRUBACHER
—Died August 12th, 1935.

"Asleep in Jesus."

We cannot say, and we will not say,
That she is dead! She is only away!
With a cheery smile, and a wave of the
hand,
She has journeyed to—that Heavenly
Land.
And left us dreaming, how very fair
It is to her, since she is abiding—
"there."

Awaiting us, a chance to greet
A welcome, at our joyful, and "happy
meet."

—Sadly missed by her bereaved
husband and family.
